BUILDINGS AND MONUMENTS, MODERN AND MEDIÆVAL:

Being Illustrations of the Edifices of the Nineteenth Century, and of some of the Architectural Works of the Middle Ages.

By GEO. GODWIN, F.R.S.

Fellow of the Institute of Architects; Corresponding Member of several Societies.

OPINIONS OF THE PRESS.

"The bold and effective woodcuts which have now appeared for some years past in the weekly sheets of our excellent contemporary *The Builder*, must be familiar to all who are the least interested in architecture if it were only from the show they make among their fellows of the unassorted prints in the windows of the news vendors. It will, we are sure, be very acceptable to such as set a higher value upon these prints than the ephemeral pleasure they give on their first appearance to have an orderly and well-printed promotion at a very moderate price. In the republication now before us, with the advantages of glossy ink and vellum paper, they assume a beauty which some persons will be scarcely prepared to expect, who are not fully aware of the great importance of good printing to good engravings."—*Gentleman's Magazine.*

"This cheap and handsome reprint of the principal cuts which have appeared from time to time in *The Builder* is an exceedingly useful addition to illustrated literature. We know that work is read and questioned by many who have no connexion with 'building;' there are, however, a class who are not aware of the value or curiosity of the many engravings, and such persons will, no doubt, deal themselves of this handsome re-issue of them, printed on fine paper, and with greater care, and accompanied with a proper amount of descriptive letter-press."—*Art Journal.*

"A public issue of much merit and interest. The articles are able and sensible, the engravings excellent."—*The Literary Gazette.*

"The idea of republishing in a separate and handsome form some of the best architectural subjects that have been given in *The Builder* was a good one. Besides being thus brought together within a comparatively small and convenient compass, separated from miscellaneous matter of only temporary or local interest,—the woodcuts are so greatly improved in appearance that they cannot seem to be from the same blocks as before. The same illustrations, or the same number of them, could not have been brought out at the same price had not the blocks been already executed, and had they not served their purpose in a periodical having an enlarged sale."—*The Athenæum.*

"Unparalleled alike in the artistic worth for cheapness as well as for utility and beauty of effect.—It is among the cheapest and the best works."—*The Mind ever published.*

"This ought to be supported by public patronage, for it certainly affords at a very moderate price, a greater quantity and variety of entertainment to the eye as well as to the mind than has hitherto been afforded by any popular architectural publication. It appears to us a judicious plan, illustrating new buildings, together with others of older date."—*The Globe.*

"This is a cheap book, most skilfully carried out. Fine printing, and a deep yellow paper give a most charming effect to these vigorous and faithful illustrations of the fifth or of the nineteenth century, and of some of the architectural works of the Middle Ages; and the work will thus worthily fill a gap in pictorial literature—for we have no popular book of reference on modern architecture. Mediæval structures, moreover, have rarely been more effectively treated."—*Northampton Chronicle.*

Spectacles, Telescopes, Microscopes, Opera and Race Glasses, Barometers, Quadrants, Compasses, Barometers, Surveying Instruments, Balances, Scales, &c., of every description.

41, Ludgate-street, St. Paul's.

PATENT WHITE ZINC PAINT.—JOHN WARNER and SONS are prepared to supply this paint to builders, painters, and plumbers, on wholesale terms. It is free from all poisonous qualities; it is not affected by sea-water, sulphureted hydrogen, or any of the gases; and preserves its original colour where white lead paint will not.—Prospectuses to be had at J. Warner and Sons', 6, Cripplegate, Jewin-st., London.

HUBBUCK'S PATENT WHITE ZINC PAINT.—ANNOUNCEMENT.

FOR MARINE USES, it possesses the following advantages:—It is whiter than any other Paint, and retains this whiteness for years, unaffected by bilge-water, or noxious vapours from cargo. The White Paint in the hold of a ship, after discharging a mixed cargo, is found to be as white as the year before, when new painted. Under these and other circumstances, when a very silver paint hitherto known, and tried, has failed, the "White Zinc Paint" has preserved the freshness of its colour. Moreover, by virtue of its galvanic action on iron, it enters the pores, and forms an amalgam of the two metals, which protects the iron from rust, decay, or incrustation.

For the ORNAMENTAL PURPOSES of the decorative painter, the "White Zinc Paint" has been found unparalleled in extent of clearness of colour, durability, and beauty of texture. It has not so hard as to admit of polish, equal to the finest coach panelling.

For SANITARY PURPOSES the "White Zinc Paint" is valuable, not only from its being totally free from every injurious injurious to health, but from its combining chemical qualities which render it a powerful corrective where contagious diseases have prevailed. Furniture or buildings painted with it are not disfigured. Paralysis and Painters' Colic, are avoided by its use, as well as similar results to the occupants of newly painted rooms. Apartments may be immediately occupied, without injury to the health of children or the most delicate constitution. It becomes cheaper than common paint, from its spreading over a much larger surface. Part of this paint covers as much as is usually covered by 3 cwt. of white lead. Each cask is stamped with the name "Hubbuck—London—Patent," as the style of the Manufacturers. A circular with full particulars may be had of the manufacturers, THOMAS HUBBUCK and SON, Colour Works, opposite the London Dock.
